

Design

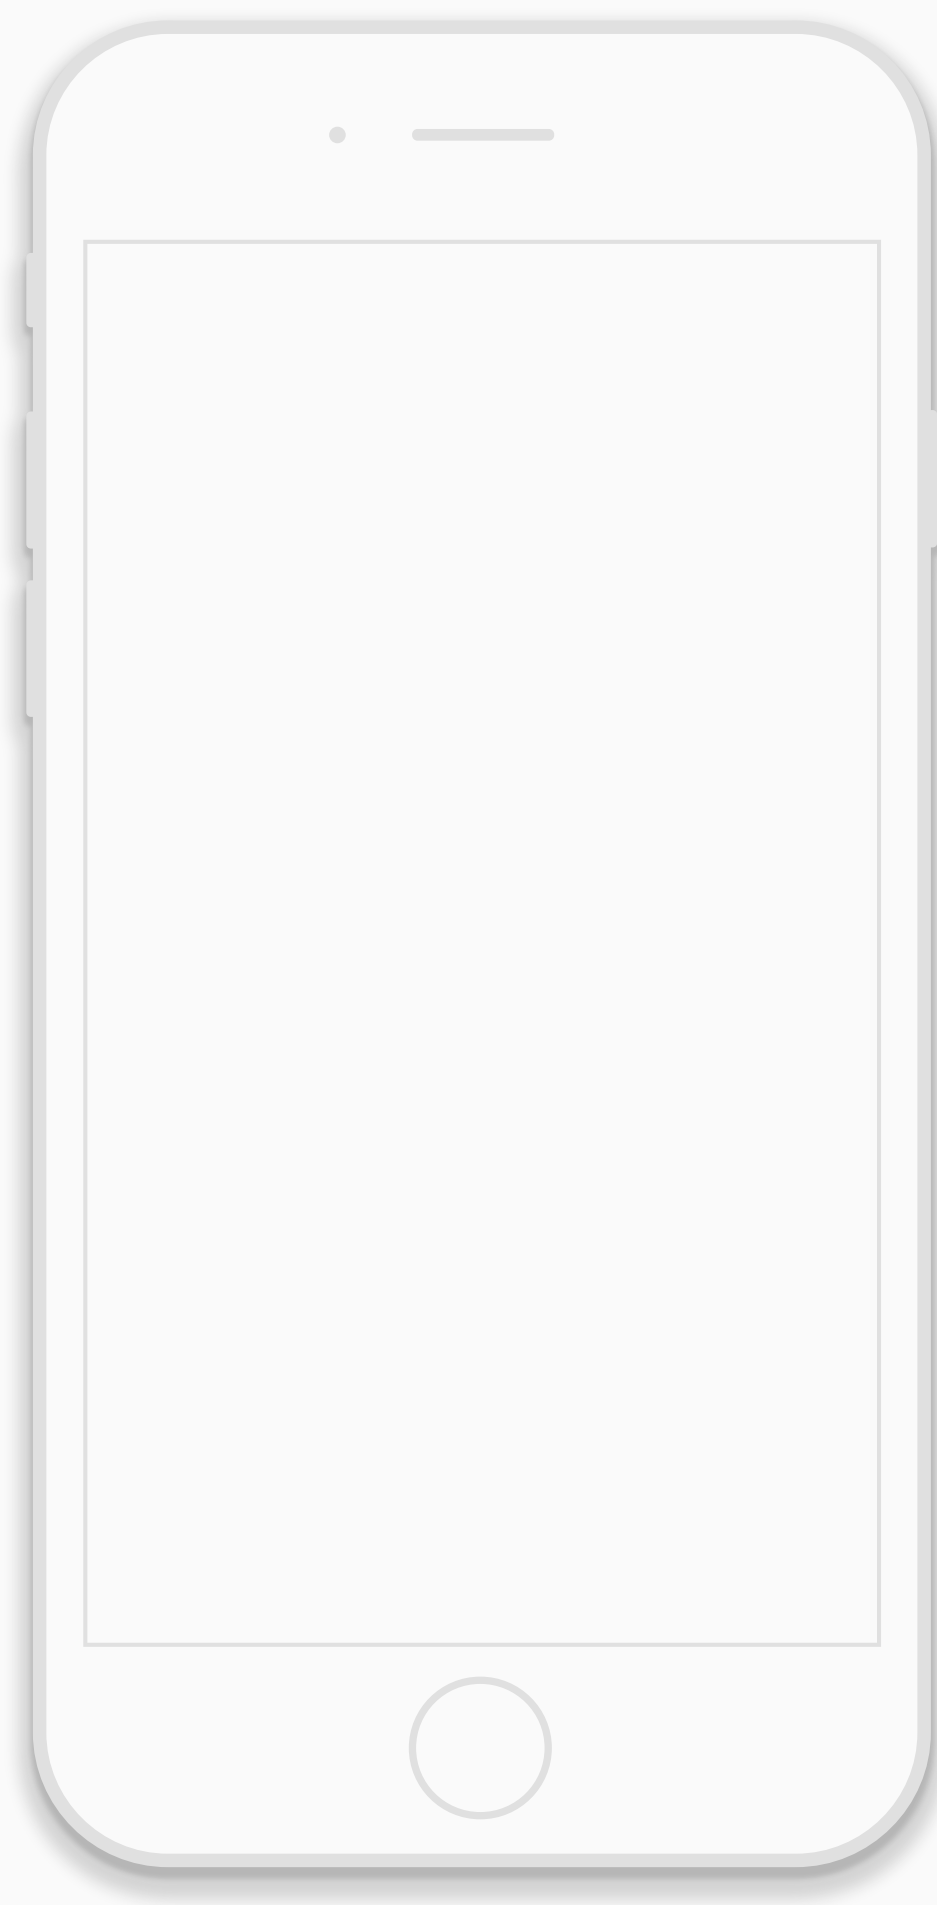

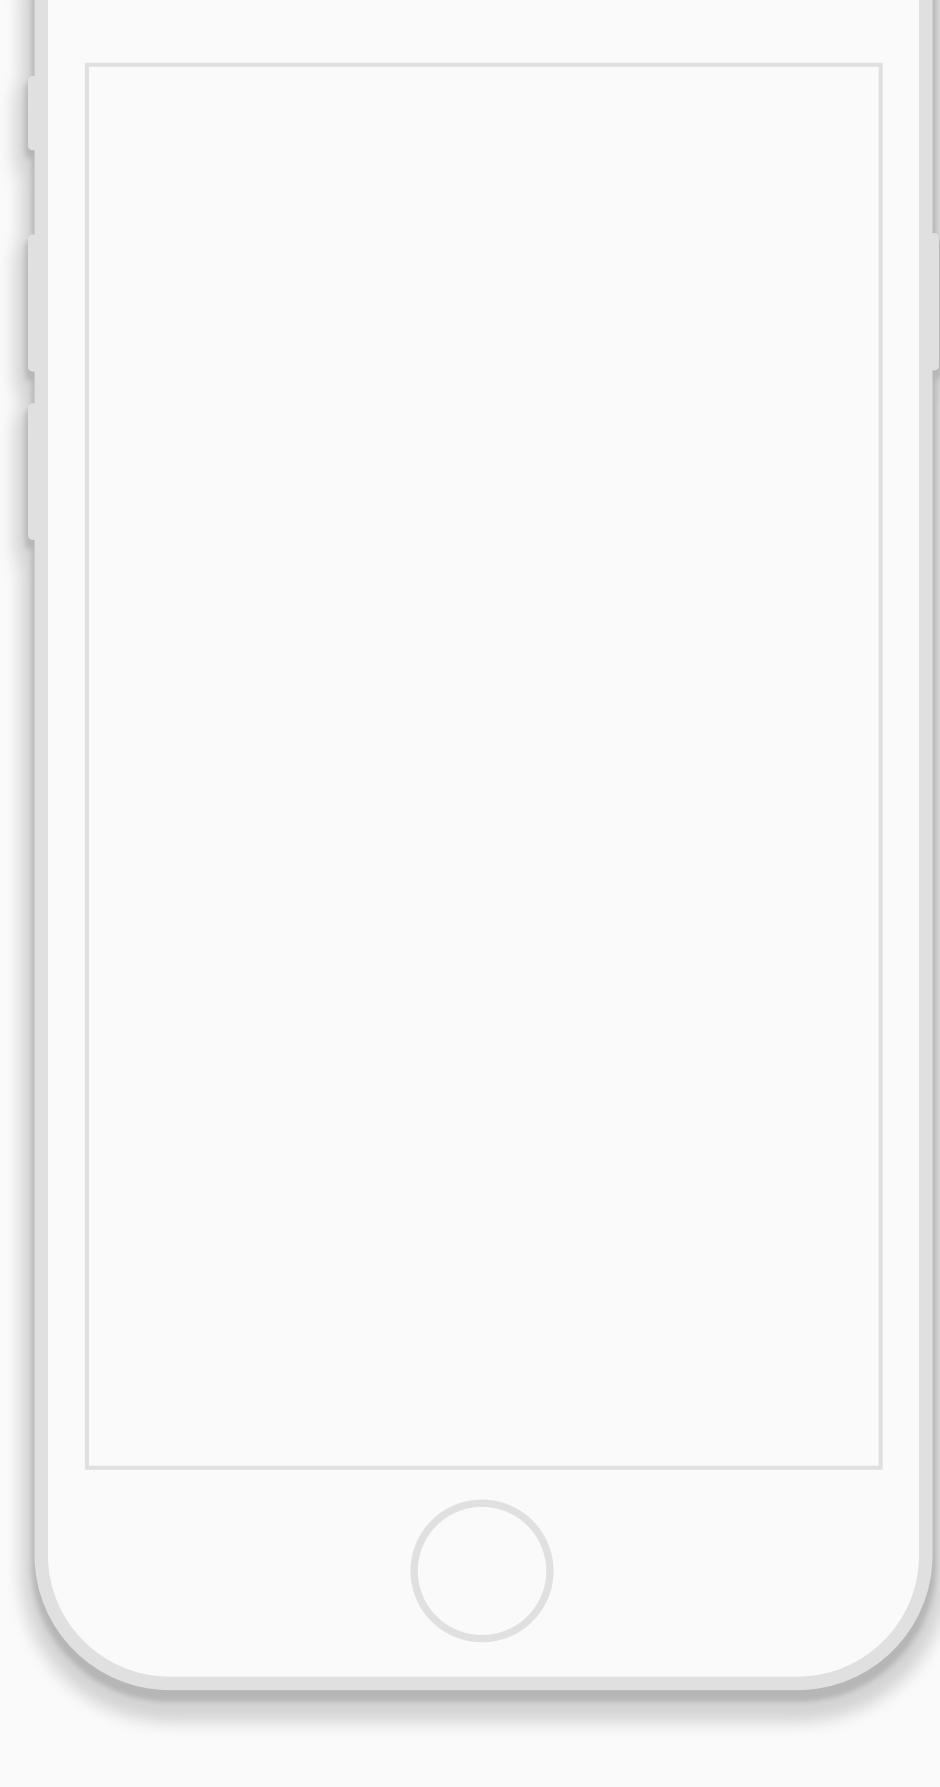

“Quote of some sort that talks about the design of the app and how it is innovative and whatnot. The quote will have to come from Pando obviously.”

Daniel Pando, Lead Designer

Designed with ergonomics in mind

Interactive Menu

B • OUT’s features a fresh take on menu navigation. It’s been designed to feature quick interactive content without the need to go into the full section to get a feeling of what’s going on around you.

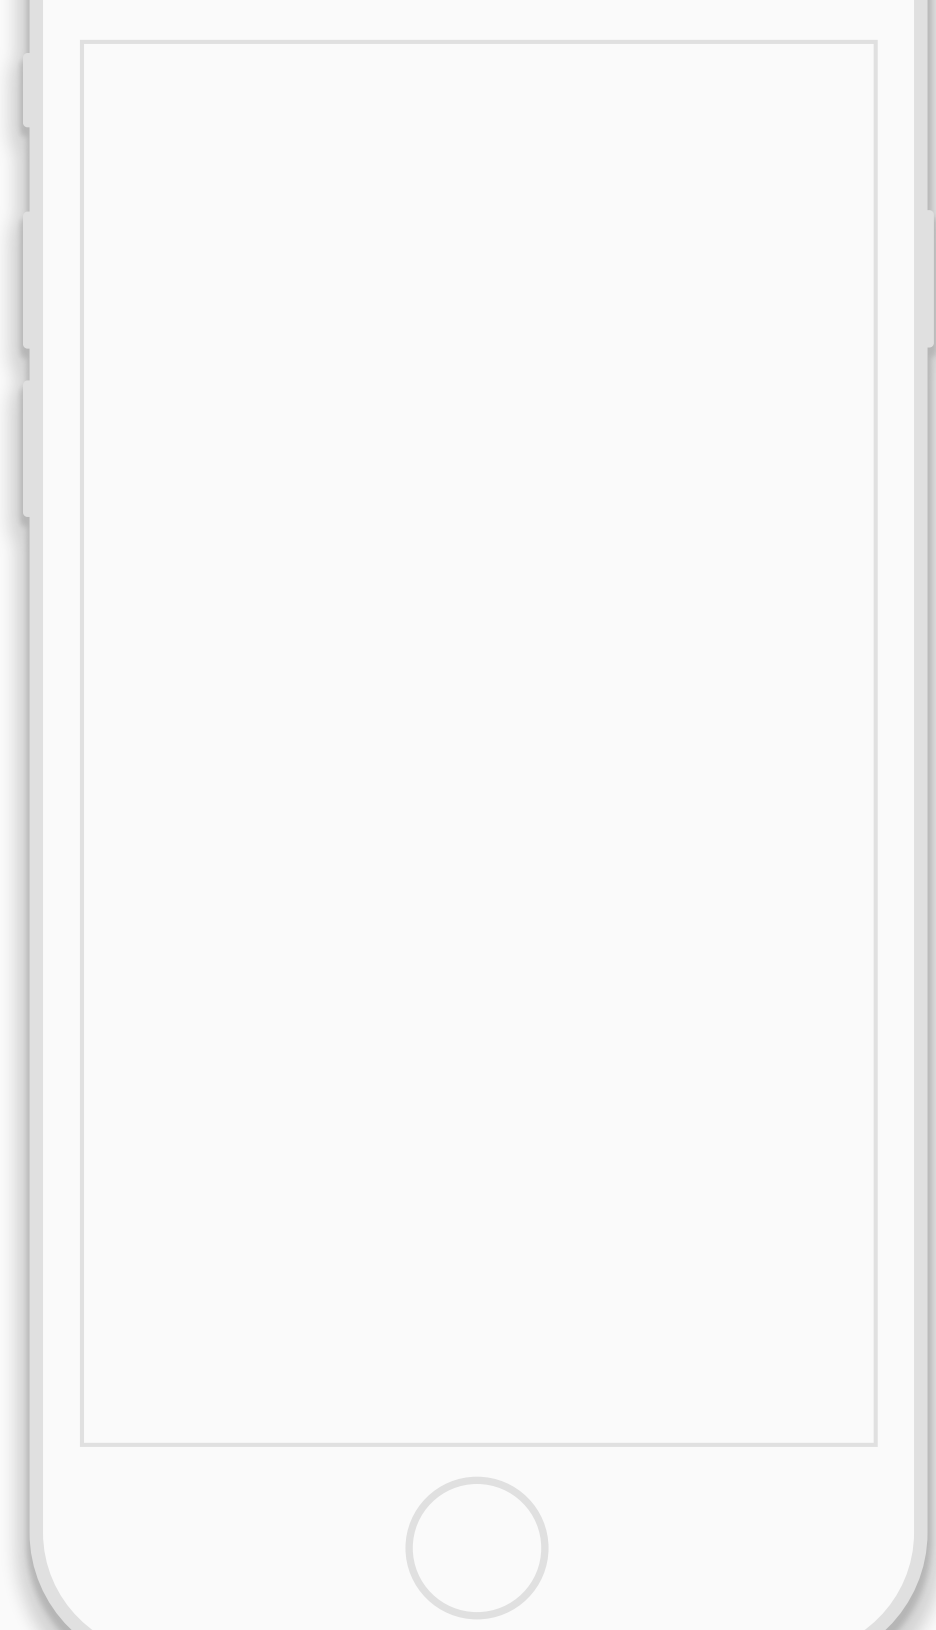

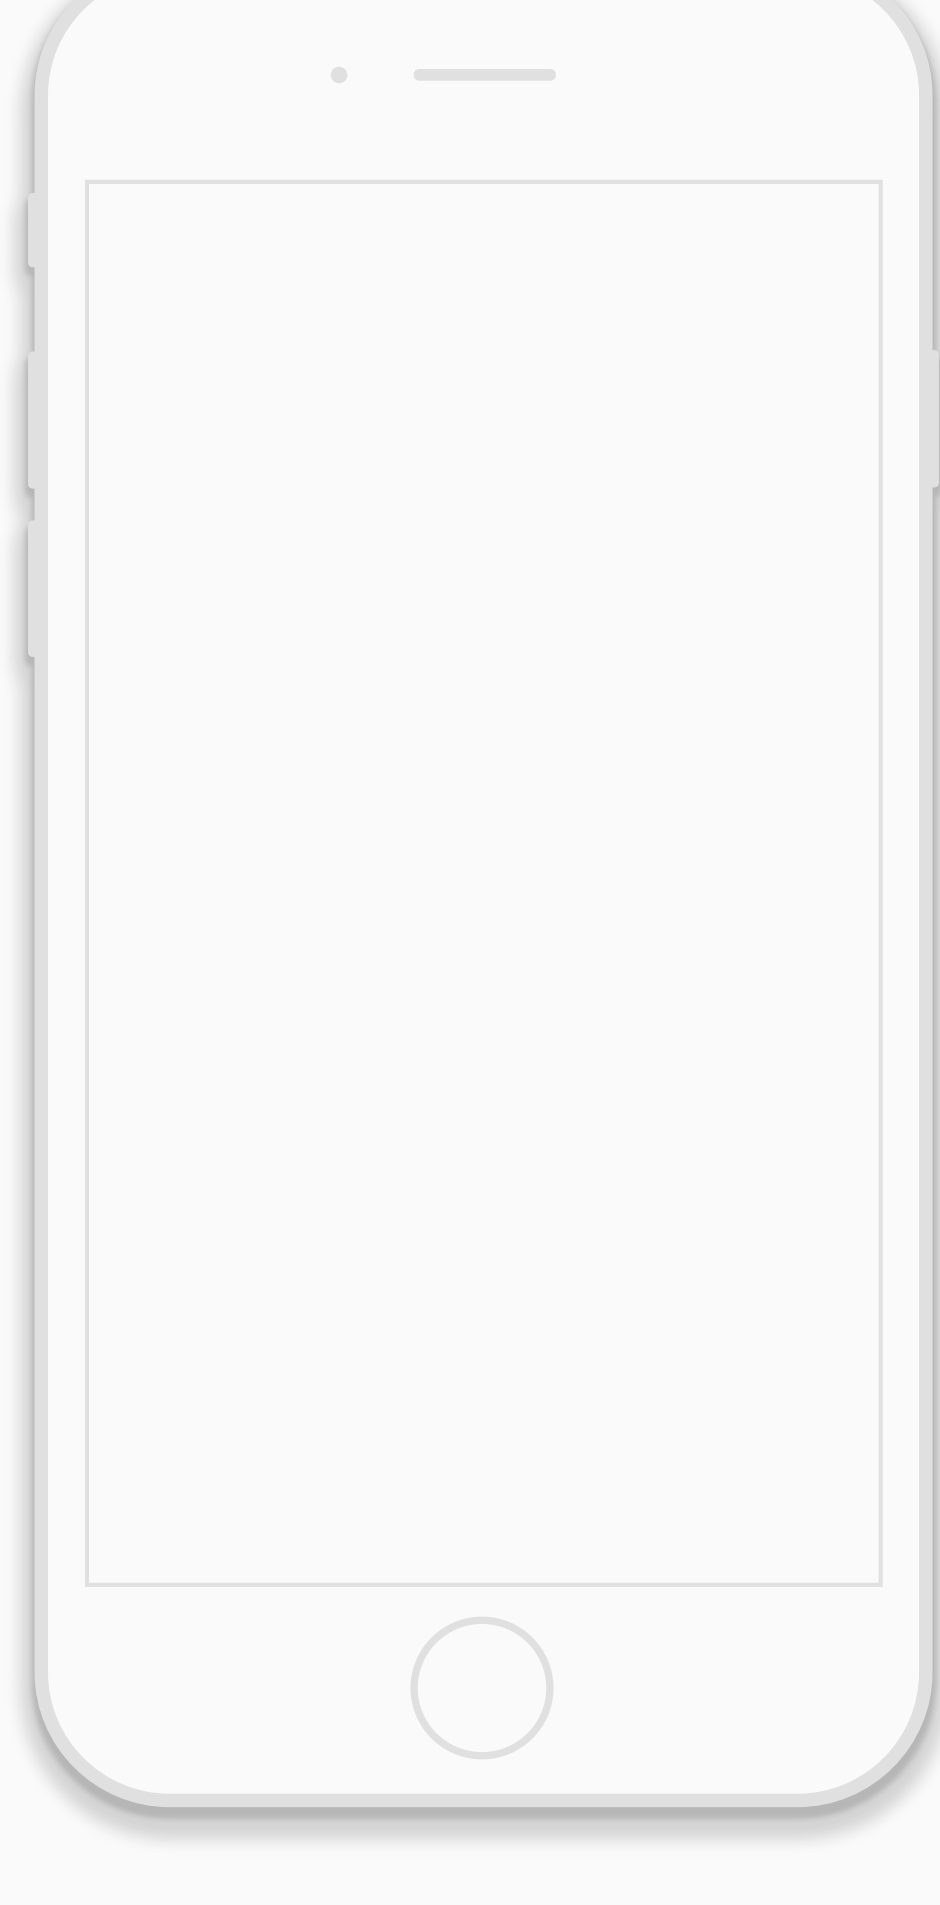

Test Drive

Give B • OUT a try without creating a profile and no commitment. Check out our great original content as well as who’s on B • OUT and what they’re up to.

One Size Fits All

An app designed from the bottom up for today’s screen sizes. Use B • OUT entirely one handed while on the go with our side capsules that change position based on your hand dominance.

Pull up on the menu bar to reveal the All-New TouchPad remote which allows you to easily navigation between the top banner cards.

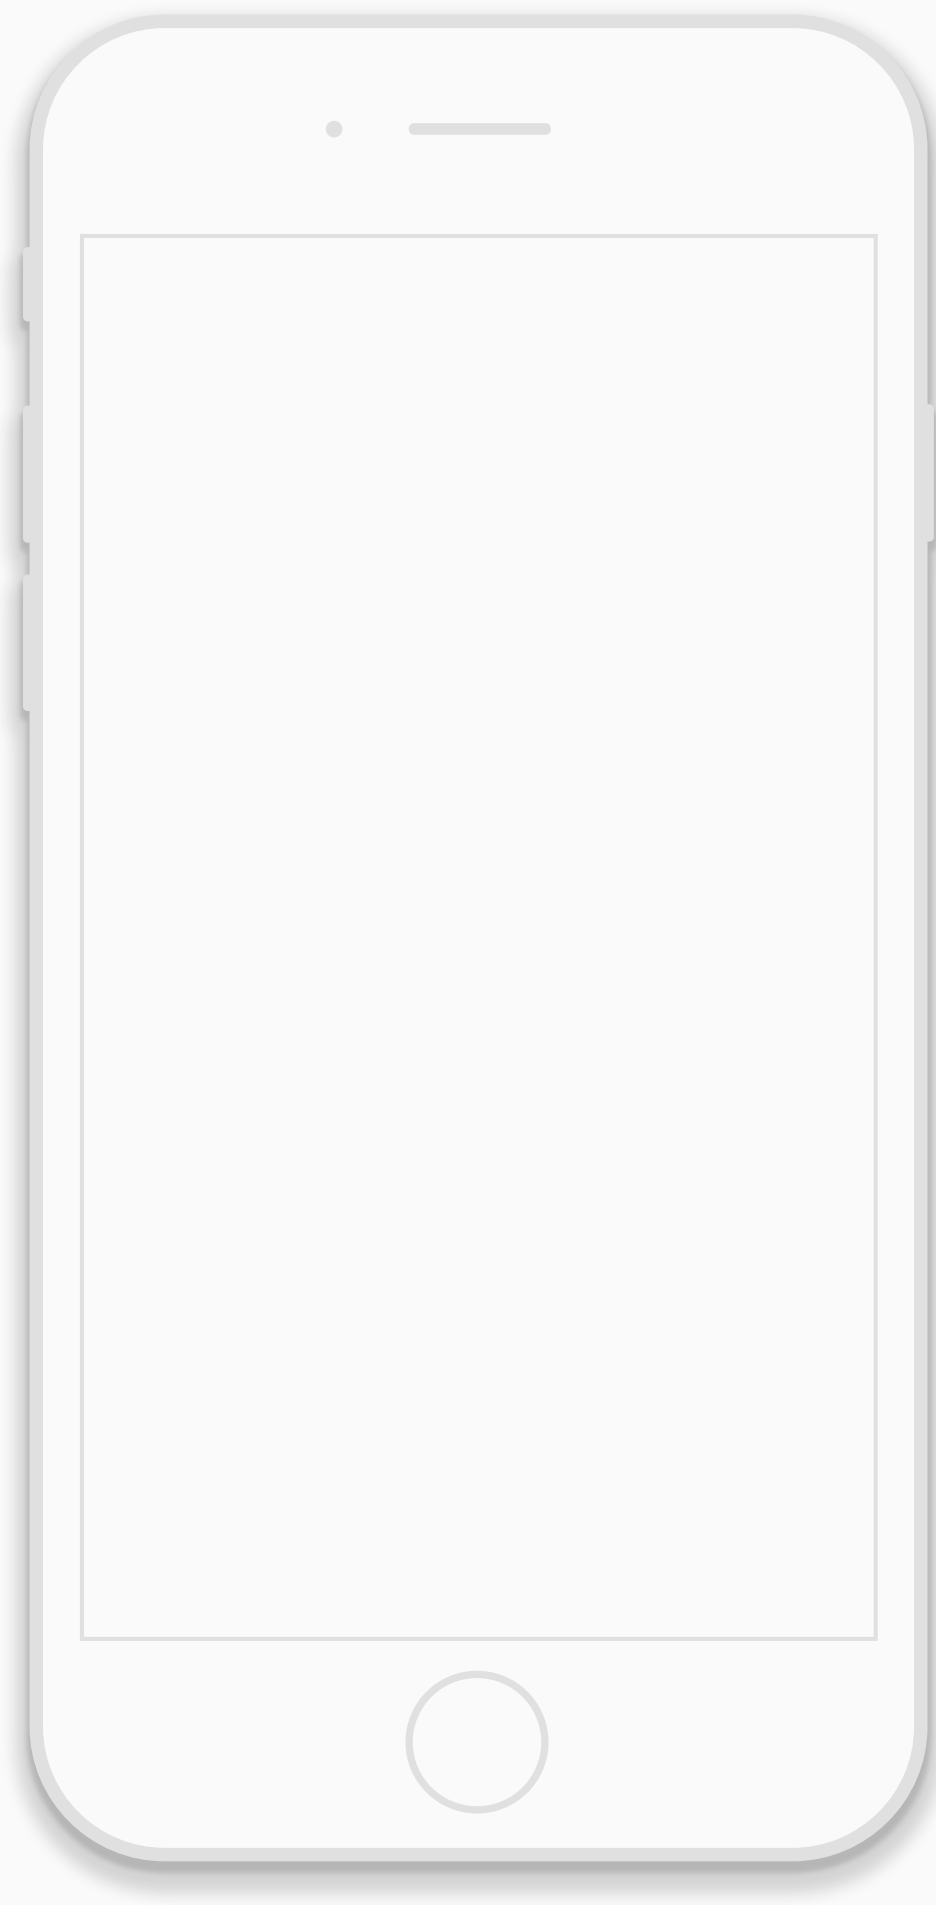

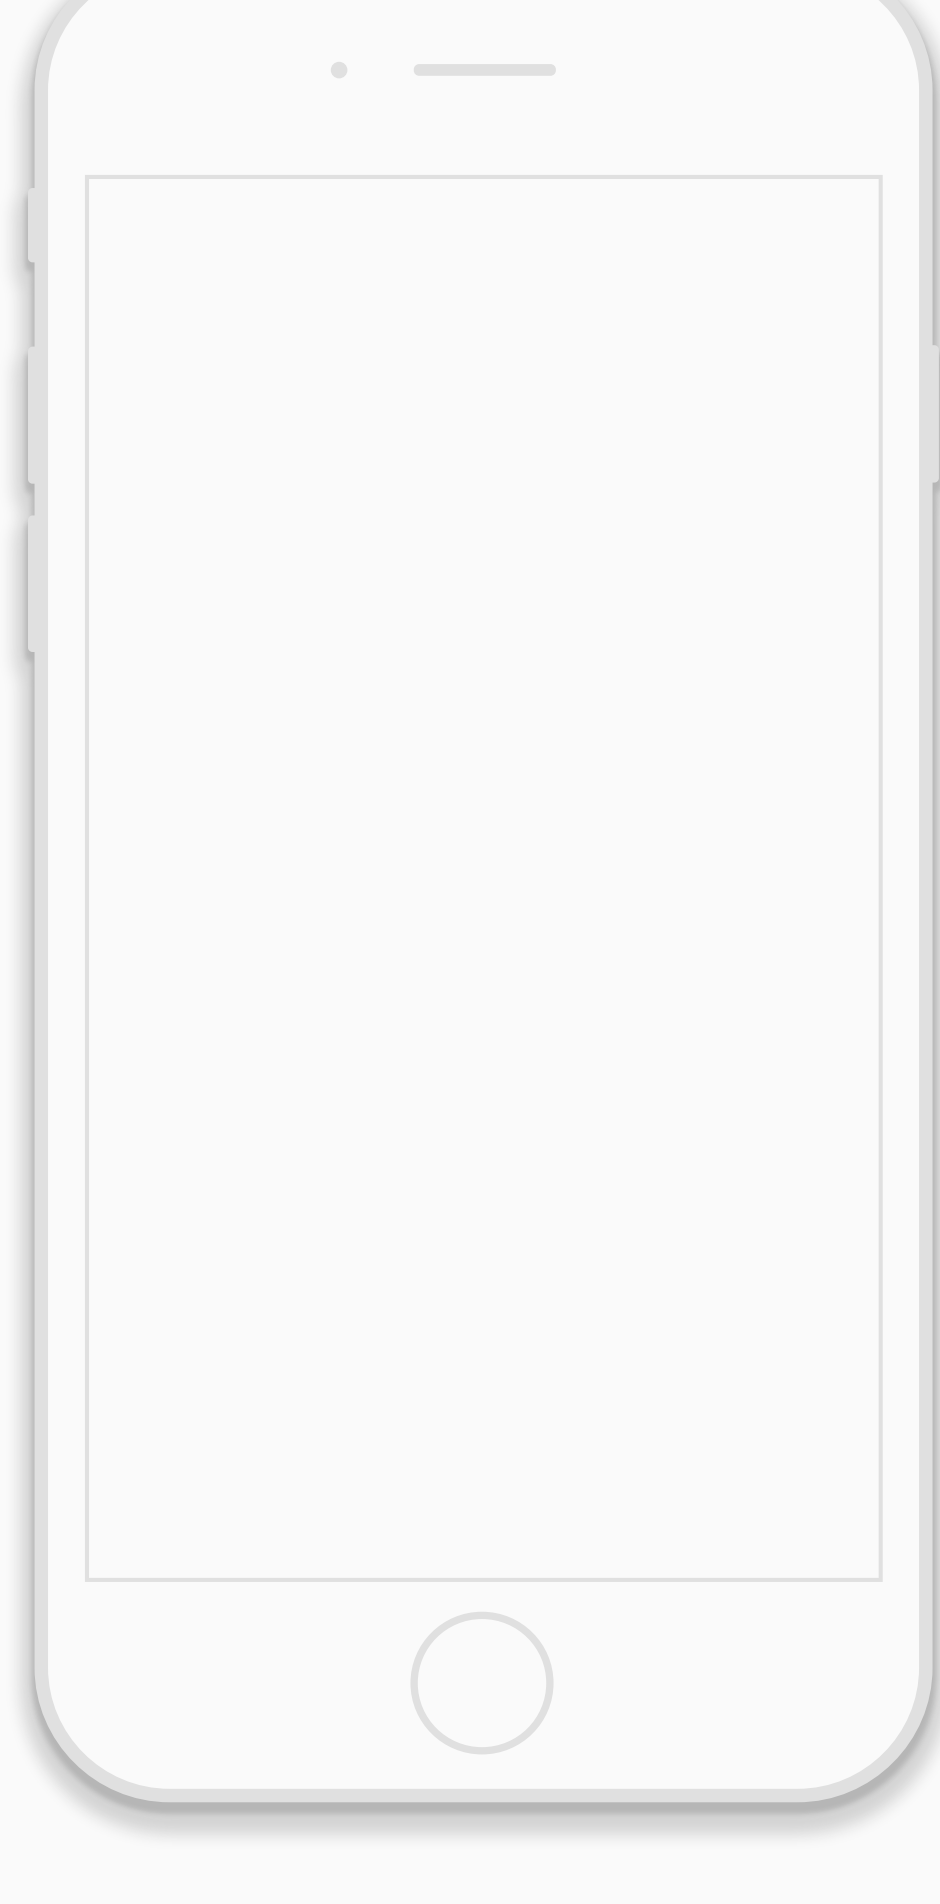

Scroll Less, See More

Collapse category pills by tapping on one to jump between lists. See the content you want without excessive scroll.

No More Notification Anxiety

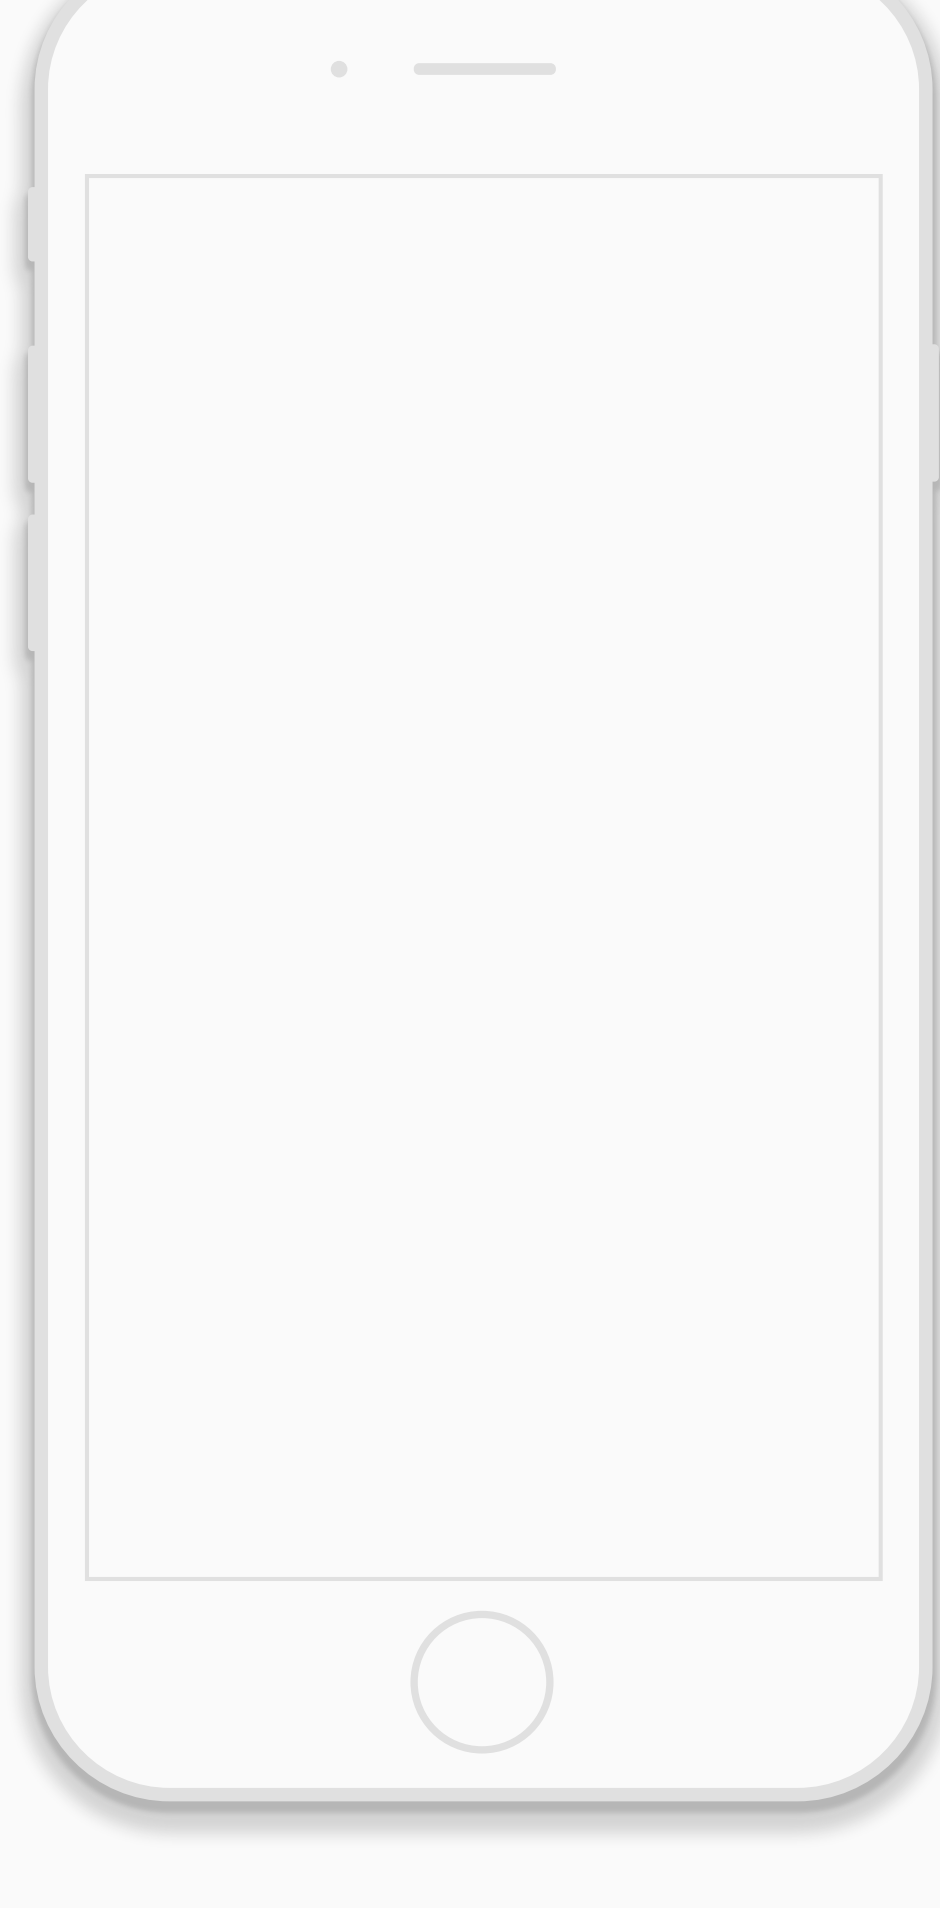

Having robust and extensive features means more areas one can be bombarded with notifications. So we removed notification counters in favor of elegant and simple notification dots.

Take control of your notifications. Only get notified by what you choose, or turn of notifications all together with a simple switch.

Menu Button Reimagined

Jump between sections of B • OUT by simply pressing and holding down on the screen anywhere at anytime.

Night Owl

B • OUT is the world’s first social media network with a nighttime feature, easing eye strain by reducing light emissions 70%. Designed for comfort and use in any dark environment.
